Preparing for Insurance Medical Examination and Laboratory Testing

Part A: Medical Examination Procedure

Medical Examination (ME) will be performed by Examiner. ME takes about 20-30 minutes and includes 3 parts as below:

Health Declaration	Examiner will ask questions on your past and recent health and your family's medical history. Come prepared with: - A list of your medical conditions and approximately when they were diagnosed, name of attending doctor or hospital, type and duration of treatment - Name of prescribed medication and over the counter medications - Your parents' and siblings' medical history, including year and date of onset If at any time you are unsure about a question, feel free to ask the examiner to repeat or explain the question
Physical Examination	Examiner will complete a full body examination, this includes but not limited to the following: - Measure your (i) height and weight; (ii) blood pressure and pulse; (iii) chest and waist circumference - Listen for any abnormal heart sound or murmur by stethoscope - Conduct breast and abdomen palpation to check for any mass or abnormal organ enlargement by means of fingers and hands and inspection of scars or other visible abnormalities - Check for other abnormal physical signs such as enlarged lymph glands, thyroid gland or hernia If preferred, you may request Advisor to arrange ME by an examiner of the same gender as you
Urine Test	Collect your urine sample to detect if abnormalities of protein, sugar and blood are present

Part B: Tips on Preparing ME and Laboratory Testing and Avoiding False Positive Results

General Preparation		• Be relaxed and have adequate sleep to help keep blood pressure within normal limits • Avoid running or physical exercise prior to exam in order to prevent elevation in blood pressure • Drink some more water, it will be easier to provide a urine sample and complete blood draw
Blood Test		Some tests require fasting for at least 8 hours before blood draw, follow instruction on “Medical Examination Requisition Form”
Female Applicant	Micro-Urinalysis	To be done 7 days after menstruation
	Pregnant	• Do not undergo any X ray testing and Treadmill test • Before performing ME and laboratory test, inform examiner/technician you are pregnant
